SUMMARY

Versatile and analytical Full-Stack Web Developer and Data Analyst with a Bachelor’s degree in Informatics Engineering. Proven expertise in designing responsive, data-driven web applications using React.js, Next.js, Node.js, and Supabase, combined with strong capabilities in Python, SQL, data processing, and business intelligence dashboards. Adept at bridging technical development with data-driven decision-making to build scalable, high-performance, and user-focused digital solutions.

SKILLS & COMPETENCIES

- **Languages:** JavaScript, Python, SQL, HTML, CSS
- **Frontend:** React.js, Tailwind CSS, Responsive Web Design, Component-Based UI
- **Backend:** Node.js, Express.js, Flask, FastAPI, REST API
- **Database:** PostgreSQL, SQLite, MySQL, MongoDB, Supabase, NeonDB
- **Tools & Deployment:** Git, GitHub, Vercel, VS Code, Postman
- **Data & Supporting Skills:** Pandas, NumPy, Excel, Data Processing, Dashboard Development
- **Soft Skills:** Problem Solving, Attention to Detail, Communication, Team Collaboration, Fast Learner

PROJECTS

Government Information & Public Service Portal — Kabupaten Probolinggo

Aug 2026

[\[https://sulistyowatimunawaroh.my.id/projects/web-probolinggo\]](https://sulistyowatimunawaroh.my.id/projects/web-probolinggo)

Next.js, React.js, Tailwind CSS, NeonDB

- Developed a responsive government information portal for Kabupaten Probolinggo, providing centralized access to public services, government information, news, events, tourism, and digital resources.
- Implemented structured navigation for public services including complaints, licensing, population administration, taxation, healthcare, education, and employment information.
- Developed dynamic sections for news, events, tourism destinations, videos, and government information to improve content accessibility and user experience.
- Designed a responsive and user-friendly interface with a focus on accessibility and clear information hierarchy.

Infly Networks — ISP Customer Management System

Aug 2026

[\[https://sulistyowatimunawaroh.my.id/projects/infly-network\]](https://sulistyowatimunawaroh.my.id/projects/infly-network)

Next.js, React.js, Tailwind CSS, Supabase

- Engineered a comprehensive customer management and multi-month billing application tailored for ISP/WiFi service providers using Next.js, Tailwind CSS, and Supabase.
- Designed a normalized relational database schema in Supabase and implemented custom Edge Functions to execute complex multi-month and prorated billing logic asynchronously.
- Solved dashboard rendering latency by implementing server-side pagination and selective data fetching in Next.js, drastically reducing page load times for high-volume subscriber datasets.

DataCo Supply Chain Analytics

Okt 2026

[\[https://sulistyowatimunawaroh.my.id/projects/dataco\]](https://sulistyowatimunawaroh.my.id/projects/dataco)

Python, FastAPI, React, Excel, Business Intelligence

- Developed an integrated business intelligence and strategic reporting system for DataCo, analyzing global operational, logistics, and financial datasets to investigate the critical gap between \$36.7M gross revenue and a low 10.8% net profit margin.
- Performed deep-dive root cause analysis and KPI evaluation, uncovering major regional bottlenecks in Western Europe that caused \$20.1M in late delivery costs, and identifying destructive clearance discount strategies that drove product profitability below 0%.
- Designed C-Level executive dashboards integrated with AI predictive anomaly detection, flagging over \$827K in potential transfer fraud risks, and delivered actionable strategies projected to improve SLA compliance from 40.9% to >80% and save ~\$10M in operational costs.

Python, FastAPI, React, Excel, Business Intelligence

- Developed an integrated business intelligence analysis by combining operational, logistics, financial, inventory, and customer datasets into a centralized strategic reporting system.
- Performed data cleaning, KPI analysis, and business performance evaluation to generate actionable insights related to logistics, inventory optimization, customer satisfaction, and sales performance.
- Designed executive-level dashboards and strategic reports to support data-driven decision-making and improve operational efficiency.

PROFESSIONAL EXPERIENCE

PT Global Jet Express

January 2026 – Present

Daily Worker Staff Processing

- Operated logistics information systems to manage inbound and outbound shipment data accurately.
- Validated package data between physical scanning results and system records to ensure data consistency.
- Created structured operational reports using Microsoft Excel to support daily monitoring and process evaluation.
- Identified data discrepancies and supported troubleshooting of shipment status issues in the operational system.

Freelance Data & Web Project Consultant

May 2024 – Present

Independent Data & Web Consultant

- Developed data-driven reports, dashboards, and small-scale web-based solutions for academic and individual projects.
- Processed structured datasets using Python, Excel, and SQL to support application features and reporting needs.
- Built simple analytical workflows and visual outputs to help users understand data more effectively.
- Communicated with clients to gather requirements, clarify project needs, and deliver structured technical outputs.

EDUCATION

Bachelor of Informatics Engineering

Sep 2020 – May 2024

Universitas Muhammadiyah Jember

GPA 3.86 of 4.00

Honors: Cumlaude, Dean’s List

CERTIFICATIONS

- **Microsoft Excel**
Coursera (by Microsoft) | 2026
- **IBM Data Analyst**
Coursera (by IBM) | 2026

LEADERSHIP & ORGANIZATIONAL EXPERIENCE

Relawan TIK Jember

Jul 2022 – Feb 2025

HR Division

- Delivered digital literacy education and training to over **1,000 participants** from various backgrounds.
- Conducted technology socializations and outreach programs for schools and public institutions.

BEM Fakultas Teknik

Sep 2022 – Aug 2023

Head of Research & Technology

- Led technology-focused workshops and managed the documentation and reporting of organizational activities.
- Responsible for managing the faculty's digital information systems and data accessibility.

ACHIEVEMENTS

Highest GPA Graduate – Faculty of Engineering <i>Achieved the highest GPA in the Faculty of Engineering with a GPA of 3.86/4.00.</i>	Aug 2024
Bronze Medal – East Java Indoor Hockey Competition <i>Won 3rd place in the East Java Indoor Hockey Championship.</i>	Sep 2023
1st Place – National Scientific Writing Competition (LKTI APSI Nasional) <i>Won first place in a national-level scientific writing competition.</i>	Feb 2022
